VICE PRESIDENT MITCHELL IS UTTERLY SHOCKED

ROANOKE Va. Dec. 1—John Mitchell, vice president of the American Federation of Labor and president of the United Mine Workers of America, when told tonight of the confession of the McNamara brothers, said he was utterly shocked.

"I confidently expected that the McNamaras would be cleared," he declared, "and that it would be shown by evidence that the Times building was blown up by a gas explosion and not by dynamite."

"Having been a mine, I have some knowledge of the use of dynamite. The report of the inspection of the tunnel building showed plainly that the basement was not damaged. Knowing that dynamite always blows downward, I felt confident it could not have been used in this case. From the beginning all the officers and leaders of the federation asked the public to withhold judgment until the McNamaras had been given a trial. This comes as a great shock to me."
